

I got XM radio for the variety of programing that I can get nowhere else. I am tired of hearing the same 100 or so songs played on my local oldies station or having to wait till the top of the hour for national news or wait till night so I can hear old radio shows. With the addition of trafic and weather I can go directly to the channel for LA 222 and get the traffic right away. I don't have to wait for 5 minutes of commercials and then my traffic and by the time i hear it I'm already stuck in the situation that I could have avoided. I pay for this option and it is my choice to have this. I pay for DirecTV and no one makes a stink about that. Leave my XM alone.
